

# TRUCK DRIVER ALERT!

All trucks frequently serving the Ports must **immediately complete the installation and registration of TruckTag** to avoid delays at the gate.

Beginning December 1, 2007, trucks arriving at the gates without TruckTags may be processed at the trouble window or turned away.

## Take These Steps Today:

- If you don't have a TruckTag, **request one today from the company you drive for!**
- **Get the TruckTag installed on your truck as soon as possible!**
- If you have already installed the TruckTag, **confirm that the company you drive for has completed registration** at eModal.
- If you believe your tag is not working, contact your company dispatcher.

## Avoid the Trouble Window!
