WCMTOA’s OffPeak Program
Managed by PierPass

OffPeak Program
2.0

October 2018
Why do we have the current OffPeak program?
To reduce congestion.

88% of containers were previously picked-up or delivered during the day between 8:00 a.m. and 5:00 p.m.
How does the OffPeak program address congestion?

With extended gates.

Before July 2005, the container terminals operated with fixed schedules: Monday-Friday, 1st shift, 8:00 a.m. – 5:00 p.m.

Extended gates were ad-hoc and their costs were negotiated between the terminals and various parties, i.e., an ocean carrier or a BCO.
Keep on Trucking at the Ports
By James Flanigan

"Either the ports change on their own or face an uprising by the people that will put a cap on their growth," says Janice Hahn, who represents the harbor area on the Los Angeles City Council.
An extended gates program was needed

WCMTDOA, the West Coast MTO Agreement, was formed
PierPass’s role with the OffPeak program

WCMTOA is made up of 12 container terminal operator members in the Ports of Los Angeles and Long Beach. WCMTOA is filed with the FMC (Federal Maritime Commission)

WCMTOA established the OffPeak program

PierPass manages the OffPeak program on behalf of WCMTOA
WCMTOA Established a TMF (Traffic Mitigation Fee) for the off-peak shift

• Mitigate traffic by incentivizing containers to move during the off-peak

• Apply the TMF toward the costs of the extended gates
WCMTOA Established a Fixed Schedule of Extended Gates

Determining the TMF Rate

OffPeak costs were determined for the extended gates using 2\textsuperscript{nd} shift costs based on:

- ILWU labor for the yard and gate only
- Non-ILWU labor for the yard and gate only
- Equipment costs for the yard and gate only
- Administrative costs

In 2017...

- $197M collected from the TMF was distributed to the WCMTOA members.
- The OffPeak program cost the WCMTOA members $274M.
The TMF is Paid by Cargo Owners

WCMTOA Schedule No. 1, Rule 2 (P), Definitions
USER – Means (i) any person, company or other entity that is named as shipper or consignee on the ocean common carrier bill of lading issued for Export or Import Cargo, or any person owning or entitled to the possession of the Export or Import Cargo or having a past or future interest in said cargo; (ii) in the case of negotiable bills of lading, any other person, company or other entity that is a bona fide holder of the bill of lading or who is entitled to receive delivery of Export Cargo or Import Cargo; and (iii) any other bailor of Export or Import Cargo.
Successful Results

Launched in July 2005, the OffPeak program’s extended gates have diverted more than 43 million trucks to nights and weekends.

“For the last decade, PierPass has instituted innovative and creative problem solving for the goods movement industry in Southern California,” “Their program has helped to bring jobs to America’s #1 port, while helping us reduce our environmental footprint in the Harbor area.”

- Eric Garcetti, Mayor, Los Angeles

“The OffPeak program has facilitated the continued growth of the Port of Long Beach, while lowering the adverse environmental impacts of their operations.”

- Robert Garcia, Mayor, Long Beach
Successful Results

Reduced daytime volumes from 88% to approximately 50+%

“Given the success of OffPeak, many don’t remember how bad it was at the ports in the years before the program’s creation. The OffPeak program really helped reduce the stress on port-adjacent communities and traffic on key freeways.”

- Congressman Alan Lowenthal
Extended Gate Programs

Once innovative – now the norm
Why Change The OffPeak Program?

WCMTOA listened to industry calls for a change and responded

- Held Town Hall style meetings with BCOs, Customs Brokers, Freight Forwarders, Trucking Cos., Marine Terminal Operators, Port Authorities, Elected Officials and Associations
- Established the Extended Gates Subcommittee (EGSC) and held smaller meetings with the EGSC and the PierPass Advisory Committee
- Circulated working papers
- Hired transportations consultants
- Reviewed alternative models
Why Change The OffPeak Program?

What was heard:

• Address the truck bunching between the Peak and OffPeak shifts – trucks queuing up starting at 3 pm
• Better planning with appointment systems
• Better planning with common business rules
• Possibly increase dual transactions as empties (exempt) would not be brought back during the day
• Reduce the TMF by spreading it across more shifts
• Do not opt for the port-wide peel-off or dynamic pricing models
Getting to 2.0 – The Process

1. WCMTOA amended its current agreement filed with the FMC to address program changes and submitted it.
2. The FMC received it and had 45 days to either allow the program to go into effect or ask for additional information. The FMC issued a Request For Additional Information (RFAI).
3. WCMTOA answered the RFAI starting a new 45 day clock, which ends on Nov 19th.
4. The FMC can challenge the program or allow it to go into effect on Nov 19th.
